

Premium Joint Supplement™

TECHNYFLEX®

CANINE

Dosage Guide

Congratulations on purchasing Technyflex Premium Joint Supplement, we are positive you will be delighted with the results in your dog.

We recommend you follow these simple steps to get the most from Technyflex.

1. Dose as product is labelled i.e. one level scoop twice daily for 10 days, then one scoop daily ongoing, remembering that this dosage guide is for an average sized dog. Correct dosing for the size of your dog is essential.
2. If after 4 weeks you feel there is more improvement still to be made in your dog, refer to below guidelines:
Dogs 1 – 10 kg 1 scoop/capsule extra daily
Dogs 10 – 25kg 1 – 2 scoops/capsules extra daily
Dogs 25 – 40kg 2 – 3 scoops/capsules extra daily
40+kg 2 – 4 scoops/capsules extra daily
3. Allow 2 weeks for the new dosage to adjust in the system. Of course over time once symptoms are under control the dosage may be reduced to the lowest effective daily dose.
4. Technyflex is dose related. Generally the more you give the stronger the effect.
NOTE: The following may require higher doses -
 - a. Heavier breeds
 - b. Severe joint disease beyond general arthritis
 - c. Strenuous exercise e.g. Greyhound racing, working dogs, long distance runners
 - d. Post-surgical joint analgesia
5. Technyflex is composed of all natural ingredients with no known side effects.
6. Technyflex is fully registered as a Veterinary Medicine and contains naturally occurring Glucosamine, Chondroitin with Co-factors Omega's, Trace Minerals and Vitamins.
